- 29 unsorted items
- 10 minute box

✱ one tap per item — no swiping, no rush

Begin ▸

SEES / LOADS
collection item counts by status

ACTIONS
pick goal · scope · timebox → creates Session (curator_id = you)

OPEN?
Session.goal drives WHICH decision_type screens appear next

< **Resume session**

you left off 2 days ago

Quick triage

in progress

19 OF 48 ITEMS DECIDED

11	5	3	29
KEPT	MAYBE	RELEASED	LEFT

Resume triage ▸ | Restart session | Abandon

↑ *decisions already made are events — resuming just continues the log*

SEES / LOADS
the curator's active Session + DecisionEvents so far

ACTIONS
resume · restart · abandon (sets abandoned_at)

OPEN?
only one active session per curator+collection, or many?

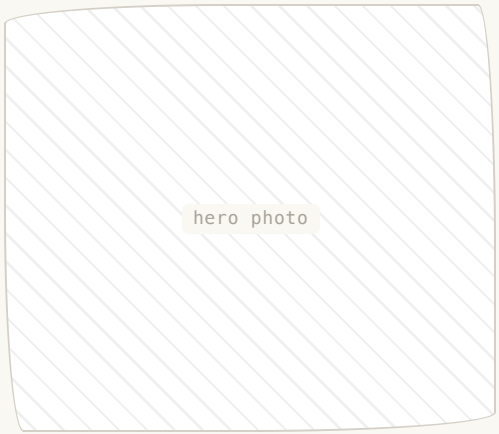

< **Triage**
goal: quick triage

Pause

1 2 3

Quick triage 7 min left

item 20 of 48

→ Keep on the left · big tap-only buttons — easy on arthritic hands

Red clutch

Coach · evening · satin

Keep
it stays

Maybe
decide later

Release
let it go

Skip
not now

SEES / LOADS
next item in scope (one at a time) + its hero photo

ACTIONS
tap Keep / Maybe / Release / Skip → writes triage DecisionEvent

OPEN?
undo = a new reversing event; show an Undo button here?

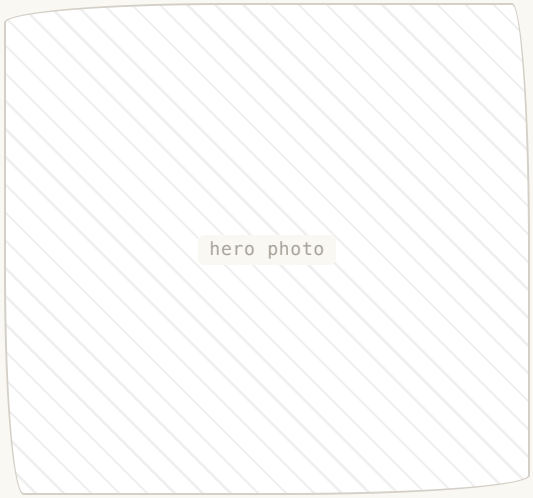

Triage · trays

variation B

Pause

1 2 3

Quick triage — 7 min left

Red clutch

tap a tray →

Keep
11 so far

Maybe
5 so far

Release
3 so far

Skip
1 so far

Undo last

→ running counts give a sense of progress

SEES / LOADS
current item + live tallies per pile

ACTIONS
tap a tray (Keep/Maybe/Release/Skip) · undo last

OPEN?
does showing counts bias the curator toward balancing piles?

Triage · fast list

variation C — for big collections

Pause

1 2 3

Quick triage — 7 min left

photo	Navy satchel	Fossil	Keep	Maybe	Release	Skip
photo	Beaded evening	vintage	Keep	Maybe	Release	Skip
photo	Canvas weekender	LL Bean	Keep	Maybe	Release	Skip

SEES / LOADS
a page of items + each row's current triage state

ACTIONS
tap one of 3 large targets per row (still ≥44px)

OPEN?
trade-off: speed vs. considered, one-at-a-time attention

< **Compare**

goal: find my favorites

Pause

✓ 2 3

Refine the top tier 5 min left

Which do you reach for more?

tap the one you'd keep · pair 14 of ~20

Brown leather tote

Madewell · everyday

Pick this

Black quilted bag

Chanel-style · evening

Pick this

Tie Skip

SEES / LOADS
a chosen pair of items (both with photos)

ACTIONS
tap a side · Tie · Skip → pairwise_compare DecisionEvent

OPEN?
who picks the pairs — the scoring engine, or random within top tier?

Compare · the line

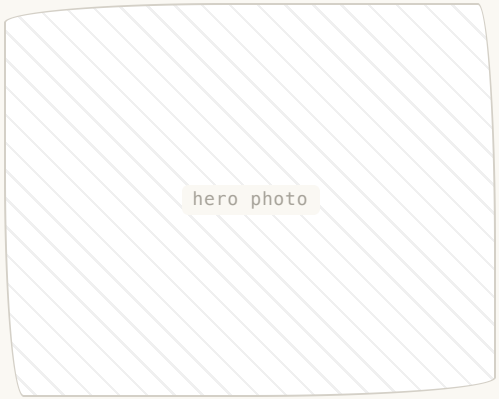

variation B — define the Love / Like boundary

Pause

✓ 2 3

Draw the Love line 5 min left

●●●● currently Love

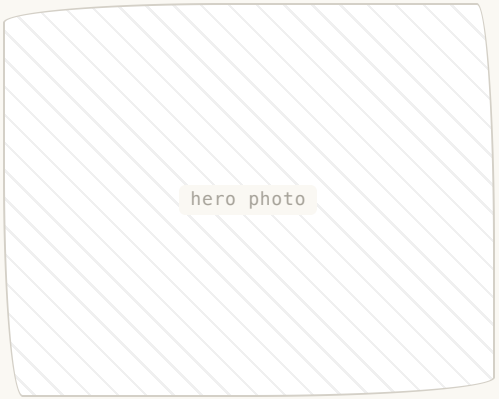

Brown leather tote

vs

where's the line?

●●●○ currently Like

Straw basket

↤ This is more "Love" | About equal | "Love" is this ↦

why? (optional) use it more | condition | sentimental

SEES / LOADS
two items straddling a bucket boundary + optional reason chips

ACTIONS
pick the side · 'why' → payload.reason on the event

OPEN?
boundary pairs are the high-value comparisons — surface them first?

Place each item

goal: discover preference · Love → Donate

Pause

✓ ✓ 3

Discover preference 3 min left

→ 4 ranked buckets + Skip to defer — the curator's vocabulary

item 31 of 48

Tan crossbody

tap the bucket it belongs in ↓

Love	Like / Useful	Meh	Donate	Skip
●●●●	●●●○	●●○○	●○○○	↪
8 so far	14 so far	6 so far	3 so far	4 so far

SEES / LOADS
current item + count in each bucket

ACTIONS
tap a bucket → bucket_assign DecisionEvent (love/like/meh/donate/skip)

OPEN?
Skip defers the item back into the queue — revisit before finalize?

< **Review results**

draft · computed from your decisions

draft

Built from 142 decisions across 3 sessions

confidence: high on top 8 · low on the middle

Re-rank manually | Finalize ▸

RANKED ORDER (computed)

1 photo **Brown leather tote** ●●●● Love — score 0.86

2 photo **Black quilted bag** ●●●● Love — score 0.80

3 photo **Beaded evening** ●●●○ Like / Useful — score 0.74

4 photo **Straw basket** ●●●○ Like / Useful — score 0.68

5 photo **Tan crossbody** ●●○○ Meh — score 0.62

6 photo **Canvas weekender** ●○○○ Donate — score 0.56

BUCKET TOTALS

●●●● Love	6
●●●○ Like / Useful	14
●●○○ Meh	6
●○○○ Donate	3

✱ SortResult is a snapshot — editing it won't change the raw events

SEES / LOADS

generated SortResult + SortResultItems (computed_rank / bucket / score)

ACTIONS

enter manual re-rank · finalize · discard draft

OPEN?

auto-generate a draft after each session, or only on request?

< **Re-rank by hand**

override the computed order — your call wins

Reset to computed | Done

↓ tap arrows to move — no dragging required
